Tile spacers for ceramic and stone tiles

WHERE TO USE

Mapei Tile Spacer is a range of spacers to be used when installing ceramic and stone tiles of various sizes, thicknesses and formats, on floors and on walls.

They are designed to help users during tile installation, to form perfectly straight, uniform grout joints and create evenly tiled surfaces.

Mapei Tile Spacers are available in various sizes and shapes to suit any type of ceramic and stone tile and different installation patterns:

- X-shaped spacers for straight patterns;
- T-shaped spacers for running/staggered patterns;
- Y-shaped spacers for hexagonal tiles;
- wedge spacers to rectify and level-off small lippage when installing ceramic and stone tiles.

Mapei Tile Spacers can also be used in conjunction with Mapei tile levelling systems from the **MapeLevel** range, making it much simpler to install perfectly at, accurate and even tiling on floors and walls.
